

Highways England Common Induction (HECI)

- Industry update 18th December 2019

Lantra recently met with Highways England Passport project lead Angelica Rice and would like to share the following information;

- Highways England have reviewed the results of the 'proof of concept' and intend to continue with the Passport Scheme
- The current HECI course remains valid and can be used until replaced with an online solution
- HECI certificates will remain valid for their full term

Highways England have advised Lantra that;

- Highways England will now invest in an online solution, which is expected next year
- Once an online solution has been developed, Lantra will not be required to continue providing the quality assurance framework for delivery of their HECI course

For information updates from Highways England the following links have been provided:
